YOUR UCAT JOURNEY STARTS HERE

This comprehensive study plan is your complete roadmap to UCAT success. If used correctly, this guide will serve as the ultimate planning tool to score in the **top 10%** of the UCAT. Inside you'll find everything you need to prepare effectively, from foundation skills through intensive practice before your test.

The plan is divided into 5 clear stages matching the natural rhythm of UCAT preparation, with specific daily schedules and strategic guidance for each section. Follow this plan systematically, adapt it to your needs, and approach your UCAT with confidence.

Stage 1: Planning & Familiarisation

Stage 2: Strategies and Untimed Practice

Stage 3: Timed Practice & Review

Stage 4: Intense Practice and Official Mocks

STAGE 1: Planning & Familiarisation

Weeks 1-2 (June 1-14, 2026)

- ☐ The first two weeks focus on understanding the UCAT format and getting comfortable with each section. This is your foundation period - take time to learn without pressure. Complete basic practice questions to familiarize yourself with question types.
- ☐ Medify and Medentry are recommended platforms for practice questions and mock exams.
- ☐ Always practice using desktop, keyboard and mouse

Date	Day	Task	Time

STAGE 2: Strategies and Untimed Practice

Weeks 3-5 (June 15 - July 5, 2026)

- ☐ Now that you understand the basics, it's time to develop section-specific strategies and build confidence through untimed practice. This stage introduces regular mock exams to track your progress. Focus on accuracy over speed.
- ☐ Practice at least 150-200 Questions per day
- ☐ Quality over quantity is crucial. Only practice when your mind is fresh and focused.

MY UCAT MOCK EXAM PERFORMANCE

1. The ucat website is always going to be more representative of your actual score, especially because Medify usually have harder questions than the actual ucat.
2. From most students' experience
 - ☐ Mocks A & B: Harder than the real exam
 - ☐ Mock C: Most realistic and accurate
 - ☐ Mock D: Easier than the real exam

Your approximate UCAT predicted score = (Score C + Score D)/2

Example : If you have scored 2250 in Mock C and 2150 in Mock D, then your predicted UCAT score is

$$(2250 + 2150)/2 = \mathbf{2200}$$

Final TIPS for Success

1. Maintain daily consistency with this schedule. Skipping days will create weaknesses in your preparation.
2. Reserve official UCAT mock exams for the last two weeks. These provide the most realistic practice experience.
3. Don't be disheartened —you'll notice steady improvement over time.
4. Don't just look at your score. Understand WHY you got questions wrong and HOW to improve.
5. Your brain needs recovery time. Don't skip rest days - they're essential for retention and preventing burnout.

6. Distribute your study sessions between morning and evening each day.
7. Master fundamental mathematics formulas- speed, percentages, units, Area/volume, etc.
8. Keep a spreadsheet of all mock scores to visualize improvement and identify persistent weaknesses.
8. Master These Keyboard Shortcuts to Save Valuable Time: • Alt + N – Move to the next question • Alt + P – Return to the previous question • Alt + F – Flag or unflag a question for review • Alt + C – Open the on-screen calculator
9. Don't judge your progress purely on numbers. Consider how much you've prepared and how confident you're feeling too.
10. Practice → Review → Reflect → Practice Again!

Trust the process, stay consistent, and believe in yourself!

Good luck on your UCAT journey! – By
